Motivated Software Developer with 3 years of experience and a **Masters Degree in Advanced Computer Science**. Skilled in Full-Stack Development, Web Development Frameworks (Vue, Angular), Game Engines and Languages, including JavaScript/TypeScript and C#. A fast learner with a passion for problem-solving, who excels in translating complex requirements into efficient and user-friendly solutions. Committed to staying updated with the latest technologies and industry trends to deliver innovative software solutions. Adept at collaborating with cross-functional teams to drive project success. Seeking opportunities to apply my expertise in creating cutting-edge software applications.

Education

2022-2023

University of Sussex

MSc Advanced Computer Science, Distinction*

Software Developed: Machine Learning Classifier, Paypal Imitation, Multiplayer Diplomacy Game, Puzzle Solver, Interactive Full-Stack Hackathon Game.

Disseration: Natural Language Processing for Making Student Essays.

2018-2022

University of Brighton

BSc Advanced Computer Science, First Honours*

Software Developed: Hashtable Implementations, Android Studio Applications, Instagram Imitation, Machine Learning Spam Filter, Interactive Breakout Game, Raspberry Pi Traffic Light System.

Disseration: Artificial Intelligence For Game Engines Using Behaviour Trees.

Experience

2022-Current

CROSSPLAY LTD

Software Developer • Virtual Reality Systems

Relevant Experience: Assisted in the development of an immersive social media platform for Meta Quest 2. This included the creation of Virtual Reality interactions using Unity, C#, and Unity's XR toolkit. Integrating Meta's Oculus SDK to load avatars and use Meta's socializing features. Connecting users for an online multiplayer experience using the Photon Engine. UI implementation for virtual controller interaction.

2019-2021

LENTAVA LTD

Software Developer • Blockchain Development

Relevant Experience: Development of generative crypto-projects using tokenized assets.

This included the development of a frontend where users could connect crypto wallets using MetaMask, mint and track tokenized assets. Generation of dynamic canvases using p5.js, and the minting of assets on the Ethereum blockchain using Solidity and Hardhat. Managing the app on Azure and Firebase and developing a performant backend for it using Express.js.

SKILLS

HTML, CSS, Tailwind CSS, JavaScript, TypeScript, Node.js, Angular, Vue.js, Django, ASP.NET, Azure, Firebase, Amazon Web Services, Unity Engine, P5.js Three.js, Babylon.js, Git, Solidity, Hardhat.
